Grid

Grid is a series of chairs and accessories for urban furniture in public spaces, which plays on the contrast between the different ways of working bent metal, in the bench, bin and guide lights versions. Designed in such a way that it can be assembled according to variable geometries for different spaces, the Grid series is a true furnishing system able to give the urban environment a new and fresh style, yet at the same time simple and elegant. The use of iron as the dominant material, in all its forms, is tasteful in the different treatments, and is combined with wood in its warmest version. The extreme attention to details, typical of the interior design industry, is also paid to the outdoor sector for public spaces, and is able to give the objects that craftsmanlike touch and quality typical of Italian design.

Description

- Bench in etched, burnished or flamed metal. The element of continuity in the collection is given by the sole leg in perforated stainless steel. The Grid bench is available in the wood version, thanks to wood insert on the seat, which was first color treated to bring out the veins in the wood.
- Guide lights: in three heights, it is available in etched, burnished or flamed metal on two sides and perforated stainless steel, with LED lights.
- Bin: in etched, burnished or flamed metal on two sides and perforated stainless steel.

Materials

Iron, stainless steel, wood
